

Holds the smallest available spacer, making difficult installs easy.

Introducing our new game-changing tool that is geared towards making your job of installing your hammer kit easier than ever before. Save your fingers with our new patented, installation tool the **FingerSaver™**.

The **FingerSaver™** grips so you don't have to, ultimately reducing down time due to injuries. It's handy hanging hole allows you to keep it where you need it. Pair that with Jacobs signature red and you are sure to be able to know where your tool is at all times.

Jacobs **FingerSaver™** tool is exclusively crafted to hold Jacobs spacers and lock collars. It's unique features and dimensions are precisely calibrated to ensure peak performance and safety when used. The **FingerSaver™** is designed to accommodate Jacobs spacers as small as 1/8th of an inch thick. This is sure to make even the most difficult installs, simple.

Features & Benefits

Features

- Ensures the safety of operators by providing a secure grip, reducing the risk of injuries during the installation of Jacobs spacers and lock collars.
- It functions as two tools in one, serving both as a spacer holder and lock collar, streamlining the installation process and enhancing overall productivity.
- The bright red color of Jacobs **FingerSaver™** not only adds a distinctive touch but also ensures high visibility, making it easy for operators to locate their tool at all times.
- Equipped with grippers on the side edges, **FingerSaver™** offers enhanced control and stability during spacer installation, contributing to precise and accurate work.
- The cost-effective nature of **FingerSaver™**, combined with its ability to decrease installation time, makes it a valuable tool for professionals seeking efficiency and affordability in their work.

Benefits

- The **FingerSaver™** significantly reduces the risk of injury to hands, leading to saved time on accident reports and OSHA documents, thereby enhancing workplace safety.
- The handy hanging hole in **FingerSaver™** allows for easy storage and quick retrieval, making it convenient to hang up in the workshop or attach to a tool belt for accessibility.
- The potential availability of multiple sizes for different rod dimensions not only saves time but also provides a one-stop solution for ordering, contributing to efficiency and simplicity in procurement.
- There is a significant reduction in dropped spacers or lock collars, minimizing the chances of lost parts on the mill floor, ensuring a more efficient and organized work environment.

Part Number	Rod Size	Spacer Width	Lock Collar
29391	3/4"	1/8" and up	No
29390	1 1/4"	1/8" and up	Yes
